HYDRALIFT SIDE-BY-SIDE CARRIER LIFT 4660SBS

NEW DESIGN

4660sbs: Hydralift Introduces a new power-carrier lift designed for the SBS. The 4660 has a reduced platform size that raises up by the SBS frame not the wheels. This keeps the weight centered over the lift while reducing the overall weight of the lift. The new design allows for a wider cargo chassis and is adjustable in/out for almost any tire size. A towing extension is include for towing your towed car with the use of your tow-bar set up.
