HYDRALIFT 5418DL

Specially designed for the Overland Adventure Vehicles where the chassis frame is higher and requiring a install heights between 25 in (635 mm) to 60 in (1524 mm). The Hydralift patented design is completely adjustable for most all installing heights.

The 5418DL is available with different top ends to accommodate most any cargo.

1. Motorcycle Rail top end, for a single motorcycle with anchoring locations.
2. 24x74 in extruded aluminum platform with adjustable anchors
3. Custom size extruded aluminum platforms

Hydralift also offers the 5418DL lift with different hydraulic packages to accommodate a wide range of cargo weight. The hydraulic system is self-contained and operates off 12v power.

Fully Adjustable

From 24 –60 in
